

NOT ALL PRP IS THE SAME

To ensure that our patients get the best outcomes, we utilize the industry's leading PRP equipment. Our EmCyte PRP System is proven to deliver higher concentrations of platelets than less effective "single spin" PRP kits used at other clinics.

OUR SOLUTIONS

Safe Procedures

Unlike other injectables, PRP is extremely unlikely to cause a negative allergic reaction.

Science Based

Platelet-Rich Plasma Therapy and its effects have been studied for over 30 years!

Regenerative Medicine

PRP Therapy is a form of regenerative medicine – offering natural aesthetic benefits.

Great Outcomes

The best part about PRP Therapy are the incredible, long lasting results!

WHAT'S IN YOUR PRP?

PRP THERAPY

Discover the amazing regenerative effects that Platelet-Rich Plasma (PRP) Therapy has to offer!

WHAT IS PRP THERAPY?

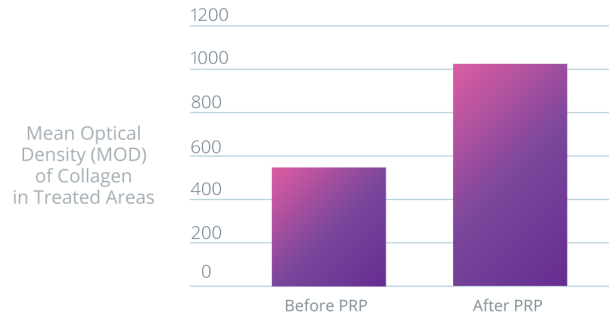

Platelet-Rich Plasma (PRP) is a regenerative injectable solution made using the patient's own blood. Platelets are special cells produced in our body that are associated with healing and rejuvenation.

When the platelets from your blood are concentrated into PRP, they can be reintroduced into your body through injections and/or microneedling to produce amazing aesthetic improvements!

PRP has been clinically shown to:

- Reduce wrinkles
- Increase collagen production
- Reduce scarring
- Stimulate hair growth

PRP Clinically Shown to Increase Collagen

Abuaf OK, Yildiz H, Baloglu H, Bilgili ME, Simsek HA, Dogan B. Histologic Evidence of New Collagen Formulation Using Platelet Rich Plasma in Skin Rejuvenation: A Prospective Controlled Clinical Study. Ann Dermatol. 2016;28(6):718-724.

HAIR REJUVENATION

PRP injections have been clinically shown to stimulate hair growth in some patients with thinning hair caused by alopecia. This rejuvenative procedure has even been shown to be more effective than traditional pharmaceutical treatments for hair-loss.

PRP Therapy can help you look youthful, naturally

PRP FACIALS

Platelet-Rich Plasma Therapy has been clinically shown to stimulate collagen production – naturally reducing wrinkles and smoothing lines for a more youthful appearance.
